ITALY.

Italy is situate in the middle of the southern region of Europe, and consists chiefly of a long narrow peninsula, projected into the Mediterranean Sea, and separated on the north-west and north from France, Switzerland, and Germany, by the Alps, which form, in most places, an almost impassable barrier. Including Sardinia and Sicily, but without Corsica, which belongs to France, the superficial extent of Italy exceeds 120,000 square English miles.

Since the downfall of the Roman Empire, Italy has never formed one state. It has always been parcelled out among numerous Princes and Lords, and now contains nine Sovereign States, one of which indeed forms an integral part of the Austrian Empire, while the others are all politically subject to the domineering influence of Austria.

NAMES OF THE STATES.	Area in Sq. English Miles.	Population.	CAPITALS.
Kingdom of Lombardy and Venice .	18,450	4,278,902	Milan and Venice.
Kingdom of Sardinia * . .	29,534	4,123,000	Turin and Cagliari.
Kingdom of Naples and Sicily .	43,052	7,434,300	Naples and Palermo.
Grand-duchy of Tuscany . . .	8,759	1,275,000	Florence.
States of the Church	17,572	2,592,329	Rome.
Duchy of Parma	2,253	437,400	Parma.
Duchy of Modena	2,145	379,000	Modena.
Duchy of Lucca	434	145,000	Lucca.
Republic of St Marino . . .	44	8,400	St Marino.
	122,243	29,673,331	

* This includes the *Duchy of Savoy*, which lies beyond the limits of Italy, on the north-west side of the Alps. It includes also the *Principality of Monaco*, a sort of mediatized State of very small extent on the sea-coast.

DENMARK.

Denmark is situate at the mouth of the Baltic Sea, between 53° and 58° N. Lat., and 7° and 13° E. Long., and is composed of a large peninsula and a number of islands, the total superficial area of which is supposed to amount to about 21,000 square English miles. The *Kingdom of Denmark*, properly so called, comprises only the peninsula of *North Jutland, the islands* between Jutland and Sweden, and the island of *Bornholm*. To these possessions have been added at different times the *duchy of Schleswick*, or *South Jutland*, the *Faroe Islands* in the Atlantic Ocean, the *duchies of Holstein* and *Lauenburg*, with the *lordship of Pinneberg*, the *county of Ransau*, and the *city of Altona*, which originally formed part of the German empire; and as sovereign of which the king now ranks as a member of the Germanic confederation.

The *Kingdom of Denmark* has been for a long time divided into *bailiwicks*, the administration of which is entirely separated from the judicial department; but in the *duchies*, which are also divided into bailiwicks, the bailies are at once ministerial and judicial officers. In the following table, the first column contains the names of the bailiwicks, and the second, the countries or islands in which they are situate.

table, the first column contains the names of the bailiwicks, and the second, the countries or

SPAIN AND PORTUGAL.

These two countries, though politically independent, form one geographical region, and cannot well be described separately. They form together a large and compact peninsula, situate at the south-western extremity of Europe, and containing about 167,000 square geographical miles; of which the *Kingdom of Spain* contains 137,400, and the *Kingdom of Portugal*, 29,600.

KINGDOM OF SPAIN.

By a royal decree, dated 30th November, 1833, the Spanish territory in the Peninsula and adjacent islands, was divided into forty-nine provinces, taking their names from their respective capitals, except Navarre, Biscay, Alava, and Guipuscoa, which retain their ancient denominations; but for military purposes, these are arranged into twelve Captain-generalships.

* Many Spanish names are spelled indifferently with j or x, both of which letters have exactly the same sound; both being pronounced as gutturals without the slightest resemblance to the sound of the same letters in English. For example—Mexico, Truxillo, Ximenes, Guadalaxara, Xucar, Loxa, are also spelled Mejico, Trujillo, Jimenes, Guadalajara, Jucar, and Loja; but in both cases the pronunciation is the same, viz. Meh-hico, Trooh-hillyo, Hhimenes, Guadalah-hara, Hhucar, Loh-ha. *Ch* is pronounced invariably the same as in the English words chair, cheese, child, choke, chuse, never hard like the Italian *ch*. The Spaniards have also a letter which they call n, *con tilde*, the sound of which is liquid, like the *gn* in French and Italian. The double N is also liquid, like the Italian *gl*.

Colonies and Foreign Possessions.—These have dwindled away, till only a few scattered islands in different parts of the world are all that now remain to the Queen of Spain and the Indies. In the West Indies, the Islands of *Cuba* and *Port-Rico* contain an area of 35,400 square geographical miles, and a population of 1,000,000. In Asia, the Spaniards possess *Luçon*, and some of the smaller *Philippine* Islands, with part of *Mindanao* and

south-eastern, are nearly 2000 miles asunder; and the breadth of the Empire stretches through 25° of lat., or about 1700 miles. It is scarcely possible to form an estimate of the population; if known to the officers of Government, they do not think proper to publish it; and all that can be affirmed of it is, that it is very thinly scattered, and that the bulk of the inhabitants are everywhere in the lowest state of poverty and moral degradation. The Ottoman Turks are a branch of the great Toorkee family from Central Asia; but their proper designation is OSMANLEE or OTHMANLEE, so called from Osman or Othman, the founder of the Empire, and the ancestor of the Imperial Family. Their total number is believed not to exceed 4,000,000; the rest of the population of the Empire consisting of Greeks, Arabs, Armenians, Turkomans, Kurdes, Druses, Maronites, Jews, &c.

The Turkish dominions in Europe and Asia were, till lately, divided into two great portions, each of which was under the charge of a *Beghlerbegh*, (Lord of Lords.) The one of these officers resided either at Monastir or Sophia, in Rumelia; the other sometimes at Angora, sometimes at Kutahya. Besides this general division, there were smaller governments called *eyalet*, or principalities, which were subdivided into *livas* and *sanjaks*, (banners.) The *eyalets* were under the superintendence of viziers or pashas of three tails, and the *livas* of mirmirans, or pashas of two tails. At the commencement of the seventeenth century, the Empire contained 44 eyalets, and 220 livas; but, at present, scarcely more than the half of these remain; and, besides, the limits of the provinces have been and are continually changing.

IN AFRICA. Egypt has been possessed for several years by Mehemet Ali, an Albanian, who, after having massacred or expelled the Mameluke *Beys*, who so long domineered over the country, has resisted all the open or secret attempts of his master to supplant him, and now rules the whole region of the lower Nile, and the adjoining districts of Arabia, as an independent sovereign, with a merely nominal acknowldgement of the Emperor's supremacy. He possesses, likewise, Syria, Adana, and Crete or Candia. *Tripoli* and *Barca* were possessed for more than a century by a family of hereditary *Beys* or *Bashaws*,* who were entirely independent of the Sultan; but at last, in 1835, they were restored to the empire, and the beys supplanted by the Capitan Pasha; so that Tripoli is again a province of Turkey.

* This is the old English spelling of *Pasha*, or, as the French call it, *Pacha*.

KINGDOM OF HELLAS, OR GREECE.

THIS kingdom forms the south-eastern extremity of Europe, and is nearly peninsular, being bounded on three sides by the Archipelago and the Mediterranean Sea. Its greatest length, from north to south, is about 172 miles, and the greatest breadth of its continental portion about 150; comprising an area of about 14,000 square geographical miles. It comprises the ancient Peloponnesus or Morea; the Turkish province of Livadia, and part of those of Carlilli and Lepanto, or Eastern and Western Hellas; Eubea, or Negropont; the Cyclades, and a part of the Sporades.

The kingdom is divided into 10 *nomos* or shires, which are subdivided into 46 *eparchies*. The following table contains the names of the nomos, and their chief towns; of which those in Italics are also the chief towns of the eparchies.

ASIA.

ASIA is situate entirely in the Northern Hemisphere, between 1° and 77° N. lat., and 26° and 170° E. long.; and forms one continuous mass of land, the greatest length of which, from Suez to Behring's Strait, is about 7370 geographical miles; and the breadth from Cape Comorin, in India, to Cape Taimura, in Siberia, about 4320. The superficial area is estimated at upwards of 12,000,000 square geographical, or 16,000,000 square English, miles. Asia is bounded on the north by the Arctic Ocean; on the east and south-east, by the Pacific; on the south, by the Indian Ocean; and on the west, by the Ourals, Caspian Sea, Caucasus, Black Sea, Archipelago, Mediterranean Sea, Isthmus of Suez, and Red Sea.

We intended, in compliance with the usual practice, to give a political and statistical table of Asia; but we have not been able to find materials for constructing it, and we are inclined to believe that none exist. We have, therefore, deemed it better to omit it than to impose upon our readers with a formal arrangement of figures, which would have presented nothing but a mass of conjectures, without the least approximation to accuracy. We shall merely give the names and a brief outline of the political divisions.

OTTOMAN EMPIRE, comprising *Asia-Minor* and *Syria*, with part of *Armenia*, and the countries watered by the Euphrates and Tigris, or the ancient *Assyria*, *Babylonia*, and *Chaldæa*. *Chief Towns:* Smyrna, Kutahya, Erzroum, Antioch, Aleppo, Damascus, Jerusalem, Baghdad, Bussrah.

ARABIA, possessed generally by numerous independent tribes; but the north-western part, and nearly the whole coast of the Red Sea, with the holy cities of Mecca and Medina, are under the dominion of the *Pasha of Egypt*. In the south-western corner is situate the considerable territory of the *Imam of Sana;* while the south-eastern corner and all the coast is under the dominion or influence of the powerful *Imam of Muskat*, who even extends his sway along the coast of Africa as far as Zanzibar.

The KINGDOM of IRAN or PERSIA. *Chief towns:* Tehran, Ispahan, Tauris, Shiraz, Meshed.*

TURKESTAN, possessed by numerous independent khans, the principal of whom are the khans of Bokhara, Khiva, Kokand, &c. *Chief towns:* Bokhara, Khiva, Samarkand, Khojand, Tashkend, Balkh.

AFGHANISTAN, possessed by the tribes of Afghans, who were lately subject to the kingdom of Cabul, which has been recently restored by the British government, in the person of Shah Shuja, or Sooja-ul-Mulk, the dethroned king, who had been resident for many years at Loodheeana, as a pensioner of the East India Company. *Chief towns:* Cabul, Candahar, Ghizni, Peshawar. Herat and a small adjoining district form an independent kingdom.

BELOCHISTAN, a desert country possessed by the Beloochees, a nomade people, most of whom acknowledge the supremacy of the Khan of Kelat or Kulat.

INDIA. See separate table.

EASTERN PENINSULA, containing the kingdoms of *Burmah* and *Siam*, the *Empire of Annam;* the Malay states of *Quedah*, *Perak*, *Salangore*, *Johore*, *Pahang*, *Kemamang*, *Tringano*, *Calantan*, *Patani;* the British provinces of *Tennasserim*, *Wellesley*, and *Malacca*, with the adjacent islands of *Penang* and *Sincapore;* and the country of the *Laos*, called also *Shyans* or *Shans*.

CHINESE EMPIRE, comprising *China*, *Corea*, *Loochoo*, *Formosa*, *Manchooria*, *Mongolia*, *Thibet*, *Soongaria*, and *Little Bukharia*, with a population variously estimated between 130 and 372 millions!

RUSSIAN EMPIRE, comprising *Siberia*, *Georgia*, *Mingrelia*, *Imeritia*, and portions of *Armenia*, *Azerbijan*, and *Ghilan;* the *Caucasus*, and the *Steppes of Astrakhan* and the *Kirghiz*. See illustrations of Russian Empire.

LITTLE THIBET. A mountainous region possessed by independent chieftains or princes, some of whom claim descent from Alexander the Great.

THE EMPIRE OF JAPAN, consisting of a cluster of large islands to the north-east of China.

* The vowels in Asiatic names are pronounced like those of the *Italian*, and not of the *English* alphabet. For example, Iran, Tehran, Ispahan, Shiraz, Cabul, Ghilan, Mazanderan, are pronounced—Eerawn, Teghrawn, 'Spahawn, Sheerawz, Kawbul, Gheelawn, Mazand'rawn.

* Many Spanish names are spelled indifferently with j or x, both of which letters have exactly the same sound; both being pronounced as gutturals without the slightest resemblance to the sound of the same letters in English. For example—Mexico, Truxillo, Ximenes, Guadalaxara, Xucar, Loxa, are also spelled Mejico, Trujillo, Jimenes, Guadalajara, Jucar, and Loja; but in both cases the pronunciation is the same, viz. Meh-hico, Trooh-hillyo, Hhimenes, Guadalah-hara, Hhucar, Loh-ha. *Ch* is pronounced invariably the same as in the English words chair, cheese, child, choke, chuse, never hard like the Italian *ch*. The Spaniards have also a letter which they call ñ, *con tilde*, the sound of which is liquid, like the *gn* in French and Italian. The double *ll* is also liquid, like the Italian *gl*.

TURKEY, OR OTTOMAN EMPIRE.

The Ottoman Empire, in its present diminished state, still comprehends a portion of the three divisions of the old world. In Europe, it includes *Rumelia*, or the countries lying between the Danube and the frontier of Greece; in Asia, it includes *Asia-Minor*, a portion of *Armenia*, and the countries watered by the *Euphrates* and *Tigris*; and in Africa, *Tripoli* and *Barca*,—all countries under the absolute sovereignty of the *Padishah*, or Emperor. Besides these, *Syria*, *Hedjas*, and *Egypt*, though possessed by an independent Pasha, are still considered as parts of the Empire. Of the superficial area of this wide spread Empire, no proper estimate can be made; inasmuch as the African and Asiatic portions of it extend into sandy deserts, where they have no determinate boundaries. Its extreme limits, however, the north-western, and the

THE PRINCIPALITIES.

WALLACHIA and MOLDAVIA extend along the north side of the Danube, from the Pruth to the borders of Hungary and Transylvania; the former containing an area of 21,600 square geographical miles, with a population of less than 1,000,000; the latter an area of 11,600 miles, with a population of about 450,000. These countries were formerly provinces of the Turkish Empire, governed by princes called Hospodars, who were chosen by the Sultan from among the Greeks of Constantinople, and invested with regal authority—the attainment of the office being dependent upon the price offered for it. By the treaty of Buckharest, in 1812, the Czar acquired the right of interfering in matters connected with the religion of the people; and by the treaty of Adrianople, in 1829, this power of interference was so greatly extended, that they may now be considered as virtually provinces of Russia. To the Sultan, indeed, they still pay a small annual tribute, as an acknowledgment of his sovereignty; and he continues to appoint the Hospodar, selecting him from a list presented by the boyars (nobles,) a class who are completely subject to the domineering influence of Russia. The Hospodar, when once elected, holds his office for life. The government, however, is of the worst possible kind; every thing is in the most wretched disorder; and the people are divided into the two classes of tyrants and slaves.

SERVIA is a small province of about 9000 square geographical miles, with a population of about 380,000. In the early part of the present century it was governed by Czerni Georges, a native, who had served in the Austrian army, and who, enraged at the atrocities committed on his countrymen by the Turks, had rebelled, and expelled them. The Sultan, deeming it hopeless to recover the absolute dominion of the province, resolved to resign it to a native governor, who should have the entire management of the internal administration, on payment of a certain tribute; while the fortresses should be garrisoned by Turks, and the external relations remain under the Imperial control. Georges being dead before this arrangement took place, Milotsch Obrenovich, a person who had risen to distinction during the troubles, was chosen Prince, and the dignity was guaranteed to him and his heirs by Turkey and Russia. Though Semendria has been considered the capital of the principality, yet that town, it seems, now scarcely exists; and the actual seat of government is sometimes at *Kragojevacz*, and sometimes at *Belgrade*.

UNITED STATES OF THE IONIAN ISLANDS.

THESE States consist of the islands of Corfu, Paxo, Antipaxo, Fano, Santa Maura, Theaki, Cephalonia, Zante, Cerigo, and Cerigotto, with several other islets and rocks, lying along the western and southern coasts of Turkey and Greece. They were formerly a portion of the foreign possessions of Venice; but, after the downfall of that ancient republic, they came into the possession of the French, who were, in turn, expelled by the British; and by the peace of Paris, in 1814, the Ionian Islands were left in possession of the latter. They form a sort of Republic, or rather what has been called a Constitutional Monarchy, the supreme authority being vested in a Senate, and a Lord High Commissioner, appointed by the Queen of Great Britain, and representing her as Sovereign. The fortresses are garrisoned by British troops; and the city of Corfu, in the island of that name, is the seat of government.

INDIA.

India, is situate in the Northern Hemisphere, between 7° 57′ and 35° N. lat., and between 66° 58′ and 95° E. long., measuring 1870 English miles in its greatest length from north to south, and nearly as much in its greatest breadth, in lat. 26° north, from the western border of Sinde to the eastern border of Assam. The natural boundaries of India are clearly defined. On the north it is bounded by the long range of the Himalayas; on the south by the Indian Ocean; on the east and south-east by the range of mountains which separates Assam and Arracan from the Birman Empire, and terminates at Cape Negrais; and on the west by the Suleiman mountains, which extend from the Suffeid Kho, near Cabool, to Ras Moaree, and are connected, at their northern extremity with the protruding spurs of the Himalayas. The whole country within these extensive limits is, with partial exceptions, either directly governed by the British East India Company, or more or less connected with it as tributary or allied. The superficial area exceeds 1,200,000 square miles.

India has never formed one empire, and has therefore not been subjected to any general system of administrative divisions. Different parts of the country, however, have obtained certain popular and geographical names, which are of frequent occurrence, and must therefore be mentioned as a necessary illustration of the geography of the country. 1. The mountainous region between the Sub-Himalayas and the great chain, has been called Northern India, and the British portion is known familiarly as The Hills. Northern India comprises the beautiful valley of *Cashmere*, drained by the River Jylum; the districts of *Kunnawar*, *Gurwal*, *Kumaoon*; the kingdom of *Nepaul*; the territory of *Sikim*; and *Bootan*, or the country of the Deb Rajah. 2. The Punjab or Punjaub, (the country of the Five waters,) is the region watered by the Indus and its great tributaries, the Jylum, Chenab, Ravee, Gurrah, Beeas, and Sutlege. It is divided into two portions by the *Salt Range*, a chain of hills extending across the bed of the Indus, and forming a table-land of considerable elevation on its northern side. 3. Rajpootana, called also Rajwara and Rajahstan, (the country of the Rajpoots,) occupies the middle space between the Indus and the Ganges, on both sides of the Aravulli mountains, and extends southwards to the Runn. 4. Hindoostan is the popular name of the whole country which extends from the Hills, the Punjaub, and Rajwara, to the frontiers of Bengal, and comprises the Mogul subahs or provinces of *Delhi*, *Agra*, *Allahabad*, *Oude*, and *Bahar*; and the districts or regions of *Hurrianee*, *Rohilcund*, *Doab*, and *Bundelcund*. 5. Bengal, the alluvial plain at the mouths of the Ganges and Brahmapootra, intersected in all directions by their innumerable branches. 6. Malwah, or Central India, a table-land, supported by the Vindhya and Aravulli mountains, about 2000 feet above the level of the sea, and sloping to the north-east. 7. Gujrat or Guzerate, the country on both sides of the Gulf of Cambay, including also the large peninsula of *Kattywar* or *Cattiwar*, which lies between the Gulf of Cutch and the Gulf of Cambay. 8. Cutch or Kach'h, a small peninsula to the west of Gujrat, between the Runn and the sea. 9. Sinde, the region at the mouth of the Indus. 10. The Deccan, Dekkhan, or Dukkhun, extending from the Nerbuddah on the north, to the Kistnah and Tumbudrah rivers on the south; comprising the old Mogul provinces of *Khandeish*, *Berar*, *Aurungabad*, *Bejapoor or Visiapoor*, *Beder*, *Nandere*, and *Hydrabad*. The name, however, is now generally restricted to that province of the Bombay Presidency of which Poonah is the capital, and which lies between the Ghauts and the western border of the Nizam's territories. 11. The Carnatic. divided into two regions, styled respectively Payen-ghaut and Bala-ghaut,* or the Lower and the Upper; the former comprehending the low maritime plains along the coast of Coromandel, from the Kistnah to Cape Comorin; the latter comprehending the elevated table-land between the Eastern and the Western Ghauts, including Mysore. 12. Malabar, a long narrow strip between the Western Ghauts and the sea, extending 350 miles to the north-west of Cape Comorin, and including Travancore, Cochin, and the British province of Malabar. 13. Canara, a similar strip, to the north of Malabar. 14. The Concan or Konkan, a similar strip, extending northward from Canara to Gujrat,

* The first of these names signifies literally, "Below the passes;" the other, "Above the passes." *Ghaut* means a mountain pass, or, generally, an ascending road or stair; but the name is usually, though improperly, applied by Europeans to the mountains themselves, which are traversed by the *Ghauts*.

and formerly included in the Mogul provinces of Aurungabad and Bejapoor. 15. GUNDWANA and ORISSA, a wild, and in some parts still unexplored, region, between Bengal, the Deccan, and Carnatic; the maritime portion being Orissa, the inland Gundwana, but with no well defined boundaries between them, or in any other direction, except the sea-coast. The south-eastern part of Orissa has been known by the name of the NORTHERN CIRCARS, since it was acquired by the Presidency of Madras in the year 1766. 16. ASSAM, the valley of the Brahmaputra, to the north-east of Bengal. 17. ARRACAN, a narrow strip of country, to the south-east of Bengal, between the Anapectomiou mountains and the sea.

The political divisions of India may be arranged into eight classes :—1. Territories directly subject to the officers of the British East India Company; 2. Princes, with whom the British government have treaties of alliance, offensive and defensive, who have a right on their part to claim protection, external and internal, from the British government, and grant to the latter the right of interference in their internal affairs; 3. Princes with whom the British government have treaties of alliance, offensive and defensive, but without the right of internal interference, except when required by the princes themselves; 4. Princes mostly tributary, who acknowledge the supremacy of the British government, and are bound to co-operate wtih them, but who are supreme rulers in their own dominions; 5. Princes, with promise of guarantee and protection from the British government, but supreme in their own dominions; 6. Princes with whom the British government have relations of amity and friendship; Princes protected by the British government, with right to the latter to control their internal affairs; 7. Independent native states; 8. Possessions of foreign powers. The following table exhibits the estimated extent and population of these various territories : —

and officers of government being appointed directly by the sovereign of Great Britain. The revenue, in 1836, amounted to L.400,533, and the civil and military expenditure to L.325,275. For several years every thing in the island has experienced the most rapid and beneficial improvement ; excellent roads, as good as the best in Britain, have been formed to facilitate communication ; and Ceylon promises to be, at no distant date, one of the most splendid possessions of any crown.

PULO-PENANG,* or PINANG, (officially PRINCE OF WALES ISLAND,) is situate two miles off the western coast of the Malayan peninsula, between 5° 15′ and 5° 29′ N. lat. and 100° E. long., and forms an irregular four-sided area of 160 square miles, with a group of lofty hills in the centre. Connected with Penang there is, on the opposite mainland, a territory called WELLESLEY PROVINCE, extending 35 miles along the coast and four inland. The total population of the two settlements amounted, in 1828, to 60,153.

The city of MALACCA, situate on the south-west coast of the peninsula, in lat. 2° 14′ N. is the capital of a territory extending 40 miles along the shore and 30 inland, containing, however, only about 800 square miles, and a population of 34,333. At the southern extremity of the peninsula is the small island of SINCAPORE, or SINGAPORE, containing an area of 270 square miles, where a settlement was formed in 1818, and has since risen to a considerable degree of importance as an *entrepot* for the trade of the eastern islands. Population in 1834, 26,349, of whom only 130 were whites, the rest being Malays, Chinese, and natives of the other eastern countries.

The provinces of MARTABAN, RE or YE, TAVOY, and MERGUI, to the south-east of the Birman Empire, were acquired from the Birmans in 1826, and comprise an area of about 32,300 square miles, with a very scanty population, scarcely exceeding 50,000 souls. The principal town is *Moulmein, Maulmain, Moelmin*, or *Maulamyaing*, a very thriving settlement on the south or left bank of the Saluen River, opposite Martaban, the frontier town of Birmah.

Penang, Malacca, Sincapore, and the Birman provinces, are political dependencies of the Government of British India.

* The word *Pulo*, prefixed to this and many other names in the East Indian Archipelago, is the common Malay word for *island*. Pulo-Penang, in particular, means "Betel-nut Island," the Malays conceiving its form to bear some resemblance to that vegetable production.

AFRICA.

AFRICA is situate in both the Northern and Southern Hemispheres, between 37° 20′ north, and 34° 50′ south latitude ; and between 51° 22′ east, and 17° 32′ west longitude. The greatest length from Cape Serrat, in Tunis, to Cape Lagulhas, its southern extremity, exceeds 5000 English miles ; and its greatest breadth, from Cape Verde to Cape Gardafui, is about 4800. The superficial area amounts to 8,902,000 square geographical, or nearly 12,000,000 of square English miles.

Africa is usually divided by geographers into two great sections, called North Africa and South Africa, separated by the Equator, or rather, perhaps, by a line drawn obliquely from Cape Gardafui to Biafra. North Africa comprehends two great regions, which may be named the REGION OF THE NILE and MOGHREB ;* the former comprising *Abyssinia, Nubia, and Egypt ;* and the latter divided by the Arabs into four parts, viz. 1. BELED-UL-BERABER,* the country of the Berabers, or BARBARY ; which is subdivided into *Barka, Afrikiyeh,* (Tunis, and Tripoli,) *Moghreb-ul-Ausat* (the Middle-West, or Algiers,) and *Moghreb-ul-Acksa*, (the Far west, including Marocco, Fez, Tafilelt, and Sigilmessa.) 2. BELED-UL-JERID,* (the Date-stick Country,) a long narrow tract between the Atlas mountains and the Desert ; 3. BELED-ES-SAHARA, (the Desert Country ;) and, 4. BELED-ES-SOUDAN, (the Black Country, or the Country of the Blacks, called also by Europeans *Nigritia* or *Negroland.*) The last of these portions may be farther subdivided into four parts : — 1. *Eastern Soudan*, or the basin of the Tchad, and other great lakes ; 2. *Western Soudan*, or the basin of the Joliba-Quorra ; 3. *Guinea*, the maritime region between the sea and the mountains of Kong ; and, 4. *Senegambia*, the country watered by the rivers Senegal and Gambia, and their branches. None of all these divisions have any well defined boundaries, except where they border upon the sea.

South Africa comprehends *Congo, Loango, Angola*, and *Benguela*, on the west coast ; *Ajen, Zanguebar* or *Zanzibar, Mozambico, Sofala*, and *Caffraria* or *Kafferland*, on the east coast ; and the *Colony of the Cape of Good Hope*, or *South Africa*, at the southern extremity. The whole of the interior is unknown, and none of the countries above mentioned, except the last, have definite boundaries. To these divisions may be added the islands, viz. *Madagascar, Bourbon, Mauritius, Comoro, Socotra*, and others, on the east coast ; *Madeira* and *Porto Santo*, the *Canary Islands, Cape Verd Islands, St Helena, Ascension, Fernando-po, Principé, St Thomas*, and *Annobon*, on the west.

* *Moghreb* signifies the *West ;* and all the people of Western Africa are called by the Eastern Arabs *Moghrebins* or

Labrador, Upper Canada, Lower Canada, New Brunswick, Nova Scotia, and the islands of Newfoundland, Cape Breton, Prince Edward, Anticosti, Bermudas, and Bahamas; several West India Islands, and Honduras in Central America.

4. *The United States of North America** occupy the middle region of the continent, extending from the Atlantic to the Pacific.

5. *The Republic of Texas* comprises the north-eastern portion of the Mexican territory, but its limits are still undefined.

6. *The Republic of Mexico* occupies the peninsular region south-west of Texas and the United States.

7. *The Republic of Guatemala*, or *United States of Central America*, occupies the long narrow tract between the Caribbean Sea and the Pacific Ocean. The greater part of the territory is yet a wilderness.

8. *The Republic of Hayti*, comprising the island formerly named Hispaniola and San-Domingo.

9. *Spanish America*, now consisting only of the islands of Cuba and Porto Rico.

* For this very awkward and indistinctive name, Washington Irving has proposed to substitute *Appalachia* or *Alleghania* as the national appellation; the latter, in its English form, *Alleghany*, seems to be the preferable name.

UNITED STATES OF NORTH AMERICA.

Of the territory belonging to this great confederacy, little more than one-half is comprised within the limits of the organiz. States and territories ; the remainder being still occupied by the aboriginal tribes, or the straggling pioneers of civilization. The confederacy consists at present of twenty-six States, three territories, and one district, as stated in the following table :—

* These numbers are only approximations, and those of the population are almost entirely conjectural. The Rajah of Mysore has, for some years, been suspended from his regal functions on account of misgovernment, and his states administered by an agent or commissioner of the Madras Presidency. The Rajahs of Sattara and Sawuntwaree, and some others, have been nearly falling into the same predicament; and the Ameers of Sinde have been recently (1839) compelled to enter into a subsidiary treaty with, and virtually to become the subjects of, the British Indian Government. Daoudputra has also recently been added to the list of protected states.

DEPENDENCIES OF BRITISH INDIA.

Ceylon.—This magnificent island, "the gem of the eastern seas," as it has been called, is situate near the southern extremity of the Carnatic, and separated from it by the Strait of Manaar, the navigation of which is completely obstructed by Adam's Bridge, a ridge of rock and sand which extends across it. The greatest length of Ceylon is about 270 miles from north to south; the greatest breadth, from east to west, about 140; the superficial area about 25,000 square miles. The population, according to the census of 1836, amounted to 1,098,828 souls. The interior of the island is formed of ranges of elevated table-land and lofty mountains, while nearly all round the coast there is a broad belt of rich alluvial soil, well watered by numerous streams. Ceylon is completely under the influence of the monsoons; the north-east prevailing from November to February, and the south-west from April to September, the intervening months having variable winds or calms. The eastern side of the island is generally hot and dry, the western temperate and humid, and the climate of the southern coast is more congenial to Europeans than, perhaps, any part of the continent of India. In Ceylon, as in India, they have taken advantange of the interior highlands to form delightfully cool and invigorating retreats. Ceylon is entirely a crown colony, unnconnected with the East India Company, the governor

None of all these divisions have any well defined boundaries, except where they border upon the sea.

South Africa comprehends *Congo*, *Loango*, *Angola*, and *Benguela*, on the west coast; *Ajen*, *Zanguebar* or *Zanzibar*, *Mozambico*, *Sofala*, and *Caffraria* or *Kafferland*, on the east coast; and the *Colony of the Cape of Good Hope*, or *South Africa*, at the southern extremity. The whole of the interior is unknown, and none of the countries above mentioned, except the last, have definite boundaries. To these divisions may be added the islands, viz. *Madagascar*, *Bourbon*, *Mauritius*, *Comoro*, *Socotra*, and others, on the east coast; *Madeira* and *Porto Santo*, the *Canary Islands*, *Cape Verd Islands*, *St Helena*, *Ascension*, *Fernando-po*, *Principé*, *St Thomas*, and *Annobon*, on the west.

* *Moghreb* signifies the *West*; and all the people of Western Africa are called by the Eastern Arabs *Moghrebins* or *Mogrubbins* (*i. e.* Westmen or Westlanders.) *Beled* is variously expressed in Roman letters—Belod, Belled, Biled, Blad, Bled. *Jerid* is the name of the dry branches of the date-tree, used as javelins.

AMERICA.

The continent of America extends from the 54th degree of south latitude to the 71st degree of north latitude; its extreme length, from the Straits of Magellan to Behring Straits, being 10,500 English miles. Beyond these limits, the islands of Tierra del Fuego extend one degree farther south; and, on the North-east, Greenland and the Arctic Islands, have been traced to 78° of latitude. The extent of the continent, and the islands connected with it, is estimated as follows:—

North America, ...	7,400,000
South America, ...	6,300,000
West Indies, Tierra Del Fuego, and islands in the east and west coasts,	150,000
Greenland, and Arctic islands to the north of Hudson's Strait, .	900,000
Square English miles, . .	14,950,000

NORTH AMERICA.

North America lies between 8° and 72° north latitude, and 55° and 168° west longitude. The greater part of it forms a compact mass, but the outline of its coasts is exceedingly irregular, and nearly one-third of its entire length consists of a long narrow tract between the Atlantic and the Pacific Oceans. The longest straight line which can be drawn overland, extends from Cape Lisburn, in Russian America, to Cape Florida, a distance of 4260 miles; but the length of a somewhat winding line, stretching from the Isthmus of Panama, to the Arctic Ocean, west of Mackenzie's river, falls little short of 5900. Its greatest breadth, between 62° and 54° north latitude, is nearly 3000 miles; while to the south of the 30th parallel it becomes gradually narrower, till at Panama it is not more than 30 miles across.

Although a large portion of North America is still occupied by the aboriginal tribes, and there are extensive tracks unfitted for the residence of civilized man, yet the whole continent has been, at least nominally, divided by lines of demarcation among certain European powers, and their colonists.

1. *Danish America* comprises Iceland, Greenland, and the islands of Santa Cruz, St Thomas, and St John, in the West Indies.

2. *Russian America* consists of the north-western peninsula, with a strip of coast reaching to the most southerly point of Prince of Wales' Island. The only establishments, however, besides the capital, within this vast territory, are a few factories and forts of the Russian American Fur Company. The capital is *New Arkhangel*, on Sitka Island, a town with 10,000 inhabitants. The company have also a fortified factory at Bodega, on the coast of California.

3. *British America* comprises all that immense region which lies between the Polar Basin and the United States; but to the westward of the Rocky Mountains the boundary is still a matter of dispute, the British claim extending southward to the Columbia River, while, on the contrary, the United States extend their claims northward to the Russian border on the sea-coast. The British territory is divided into Hudson's Bay and North-western territory,

The British dominions in North America are divided into the five provinces of Lower Canada, Upper Canada, New Brunswick, Nova Scotia, Prince Edward's Island, and Newfoundland; besides the Hudson's Bay and north-west territory, and the Bermudas or Somers' Islands, in the Atlantic Ocean. To each of these provinces a constitution has been granted, founded on that of the mother country; and each has a governor, or lieutenant-governor, a legislative council appointed by the Crown, and a house of commons or representatives chosen by the people.

TEXAS.*

This new state is situate on the north-west side of the Gulf of Mexico, but its western and southern boundaries are still undefined. It has been formed by a number of citizens of the United States, who obtained grants of land in the province of Texas from the Mexican government, and, in 1835, declared themselves independent. The Mexicans endeavoured to crush the rebellion, but the settlers having been joined by a great number of volunteers from all parts of the States, defeated the Mexican army, which was led against them by General Santa-Anna, the President of the Republic, and took the leader prisoner. On the 17th of March, 1836, a convention of delegates unanimously adopted a constitution, which, in its general principles, closely resembles that of the United States; and the first congress held its first session at Houston, the seat of government, on the 1st of October, 1836. The executive authority is vested in a chief magistrate, styled the President of the Republic of Texas, and the first president chosen was General Samuel Houston, the successful leader of the revolt.

WEST INDIES.

These islands are divided into four principal groups, as follows :—

1. The Greater Antilles, Cuba, Hayti, Jamaica, Porto-Rico.

2. The Caribee Islands, consisting of Tobago, and all the islands between it and Porto-Rico; subdivided into, 1. The *Leeward Islands*, consisting of Dominica, and all the islands to the north of it; and, 2. The *Windward Islands*, consisting of Martinique, with the islands which lie to the south of it. St Thomas, St John, Santa Cruz, Tortola, Virgin-Gorda, and their dependencies, are also called the *Virgin Islands*.

3. The Bahamas, or Lucayos, consisting of all the low islands to the north of Cuba.

4. The Smaller Antilles, consisting of the islands along the coast of South America, viz. Trinidad, Margarita, Tortuga, Saluda, Orchilla, Buen-Aire, Curaçoa, and Oruba.

MEXICO.

The Republic of Mexico was divided, by the constitution of 1824, into 19 States, 4 Territories, and the Federal District; but a decree of 1835 provided for a new division of the country into departments. Before the declaration of independence, February 24, 1821, Mexico or New Spain, was a viceroyalty of Spain, and was divided into 12 intendencies and 3 provinces, and now contains a population of about 7,687,000.

CENTRAL AMERICA.

This country, which was formerly a province of Spain, and styled the Captain-Generalship of Guatemala, was declared independent by the people on the 15th of December, 1821, and was incorporated with Mexico; but on the fall of Iturbide, it disconnected itself from Mexico, and was formed into a separate independent republic November 22, 1824, under the title of Federal Republic of Central America; and the government was organized in April, 1825. It comprises 5 States, with a population of about 2,000,000.

SOUTH AMERICA.

This extensive continent is a peninsula, connected with North America by the narrow isthmus of Panama or Darien, which in one part is only thirty miles across, and not more than 633 feet above the level of the Pacific Ocean. The greatest length of the peninsula from north to south is 4550 miles, and its greatest breadth 3200. It covers an area of 6,500,000 square miles, about three-fourths of which lie between the tropics, and the other fourth within the southern temperate zone.

Divisions.—New Granada, Venezuela, Equador, or Ecuador, Peru, Bolivia, or Upper Peru, Chili, the Argentine Republic, or United States of Rio de la Plata, Paraguay, Uruguay, Brazil, Guyana, Patagonia, and the Archipelago of Tierra del Fuego.

Soon after the invasion of Spain by the French in 1808, a revolutionary spirit began to manifest itself in the Spanish colonies; and, before long, all these colonies, one after another, declared themselves independent, and formed republican constitutions, most of which were modelled, in a great measure, upon the constitution of the United States. The people, however, were little accustomed to free institutions, and were ill prepared, by character, education, and habits, to sustain a republican government; and their condition, since the declarations of independence, has been, for the most part, a state of revolution, disorder, and misrule. But the history and statistics of these republics are very imperfectly known.

OCEANIA.

The islands to the south-east of Asia have been usually considered as appendages of that continent; but they are now classed by the Continental geographers along with the islands of the Pacific Ocean, as a fifth division of the World, under the name of Oceania or Oceanica. Oceania is divided into Western Oceania, or Malaysia; Central Oceania, or Australasia; and Eastern Oceania, or Polynesia.

MALAYSIA.

This division derives its name from the Malays, a peculiar variety of the human race, to which the principal, if not the dominant people of the Archipelago belong; and is subdivided into the following groups, viz.:—

1. The *Sumatran group*, comprising Sumatra, Banca, Billiton, Lingan, Panjour, and other islands on the east and west coasts of Sumatra.
2. The *Javan group*, comprising Java, Madura, Bali, Lombock, &c.
3. The *Sumbava-Timor group*, comprising Sumbava, Flores, Solor, Sabrao, Lomblem, Panter, Ombay, Timor, Simao, Rotti, Dao, Savou, Sumba, or Sandelwood, &c.
4. The *Moluccas*, comprising Amboyna, Ceram, Booro, Goram, Banda, Lontheir, Pulo

portions of Celebes; part of Timor, belong either mediately or immediately to the King of Holland, whose Governor-General resides at the city of BATAVIA, in Java. The Portuguese possess a part of Timor. The Spaniards possess portions of Luçon, Mindinao, and others of the Philippines; and their capital is the city of Manilla, in Luçon. The rest of Malaysia is possessed by numerous independent princes and tribes. The dominant people are chiefly of the tawny or brown variety of mankind; but several of the smaller islands, the interior of Borneo and Sumatra, and all Australasia, except new Zealand, are occupied by people of the Ethiopic or Negro race.

AUSTRALIA is now, in Britain at least, the generally received name of the large island formerly called NEW HOLLAND, which contains a superficial area of more than 3,000,000 of square miles. Within the last half century, various British colonies, distinguished by the names of New South Wales, and Australia Felix, South Australia, and Western Australia, have been planted on its shores.

New South Wales was discovered by Cook, who sailed along the whole coast, from Cape Howe to Cape York, in the year 1770. In January, 1788, a convict settlement was established at Port Jackson; but for many years the progress of discovery and improvement was very slow. It was only in 1813, that the first passage across the Blue Mountains, a range which runs parallel to the coast, was effected; but since that time, colonists have flocked to the settlement, and its progress has been unusually rapid. According to a census taken in September, 1836, the population amounted to 77,096, as stated in the following Table; and the number of sheep exceeds 1,000,000.

South Australia comprises that portion of New Holland which is situate between the 132° and 141° of east longitude and the tropic of Capricorn, and the south coast. It has been recently erected into a colony, and the first settlements have been formed upon the east side of the Gulf of St Vincent. The capital has been fixed at the town of *Adelaide*, which already contains 6000 inhabitants. A number of colonists have also recently established themselves at *Port Lincoln*, on the west side of Spencer's Gulf.

Western Australia.— The first settlers in this colony arrived at the Swan river in 1829. The limits of the colony are between 31° and 35° south latitude, and between the west coast and 129° east longitude, comprising a territory 1280 miles in length, from north to south, and 800 in breadth. The principal settlements are at the Swan river, but settlers have also spread to a considerable distance inland and along the coast, and fifteen counties have been already formed, viz. Twiss, Perth, M

6. The *Group of Borneo*, comprising Borneo, Natuna, and other islands.
7. The *Philippines*, consisting of about a thousand islands, the principal of which are Luçon, Mindanao, Palawan, &c.

AUSTRALASIA.

This name signifies "South Asia," and was originally intended for New Holland, but is now so extended as to include, not only that great island, but also Papua, or New Guinea, Wageeoo, Arroo, Louisiade, New Britain, New Ireland, the Solomon Isles, New Hebrides, New Caledonia, Norfolk Island, New Zealand, Van Diemen's Land, and a number of smaller islands between and adjoining to these.

POLYNESIA,

Or the "Many Islands," is the name given to the innumerable islands scattered over the Pacific Ocean to the south of the 40° of north latitude, and west of the 108° meridian west. Many of them are arranged in groups or clusters, while others occur at solitary distances. The principal groups are:—

The *Hawaiian Archipelago* (*Sandwich Islands;*) the *Georgian* and *Society Islands*, including *Tahiti* (*Otaheite;*) the *Low Islands;* the *Marquesas*, and *Washington Islands;* the *Harvey Islands;* the *Navigator's Islands; Dangerous Archipelago; Tonga, Friendly*, and *Feejee Islands;* the *Caroline Islands;* the *Marian* or *Ladrone Islands;* the *Bonin Islands; Easter Island*, &c. &c.

The Polynesian islands and New Zealand are inhabited by various tribes, all referrible to the Malay variety of mankind, who speak various dialects of one common language. Of these the New Zealanders are the finest race, though some others have made greater progress in civilization, particularly the Hawaiians, who form a very enterprising commercial nation, under a monarchical government. They even publish a newspaper under the title of Kumu Hawaii, or Hawaiian Monitor.

Principal Towns of New South Wales, with their Population in 1833.—Sydney, 16,232; Paramatta, 2637; Liverpool, 619; Windsor, 998; Richmond, 762; Newcastle, 586; Macquarie, 536; Maitland, 1456. The chief town on the south coast is Melbourne, on Port-Philip.

South Australia comprises that portion of New Holland which is situate between the 132° and 141° of east longitude and the tropic of Capricorn, and the south coast. It has been recently erected into a colony, and the first settlements have been formed upon the east side of the Gulf of St Vincent. The capital has been fixed at the town of *Adelaide*, which already contains 6000 inhabitants. A number of colonists have also recently established themselves at *Port Lincoln*, on the west side of Spencer's Gulf.

Western Australia.— The first settlers in this colony arrived at the Swan river in 1829. The limits of the colony are between 31° and 35° south latitude, and between the west coast and 129° east longitude, comprising a territory 1280 miles in length, from north to south, and 800 in breadth. The principal settlements are at the Swan river, but settlers have also spread to a considerable distance inland and along the coast, and fifteen counties have been already formed, viz. Twiss, Perth, Murray, Wellington, Nelson, Sussex, Lanark, York, Grantham, Wicklow, Goderich, Stirling, Hay, Plantagenet, Kent. The principal towns are *Perth* and *Freemantle*, on the Swan river, in Perth county; and *Albany*, on King George's Sound, in Plantagenet county. The population probably does not exceed 2000; and the progress of the settlement has hitherto been very slow, though steady.

Tasmania, or *Van Diemen's Land*, is a large island separated from N. S. Wales by Bass' Strait. It is about 210 miles in length from north to south, and about 150 from east to west, comprising an area of 24,000 square miles, or 15,000,000 of acres. The southern part of the island was discovered in 1642, by Abel Tasman, a Dutchman, who gave it its present name in honour of Anthony Van Dieman, the Governor-General of the Dutch East Indies. Its insularity was proved by Messrs Bass and Flinders, who sailed round it in 1799. A small penal settlement for convicts was established in 1803; and early in 1804, Governor Collins arrived in the river Derwent, took formal possession of the country, and founded Hobart Town, now the capital of the island. The population at 31st December, 1836, amounted to 43,895, viz. free males, 15,593; free females, 10,351; male convicts, 15,590; female convicts, 2071.

Norfolk Island, 900 miles E.N.E. of Sydney, is a penal settlement reserved exclusively for convicts.

In October, 1838, a new establishment was formed at *Port-Essington*, on Coburg peninsula, on the north coast of New Holland; and a town named Victoria has been commenced.

New Zealand consists of two large islands, nearly adjoining, which extend 800 miles in length, with an average breadth of only 100, and a smaller island at the southern extremity. Along its great extent of coast there are numerous harbours of unrivalled excellence, into some of which fine rivers enter, after having passed through districts of great extent and fertility. The insular position of the country, and the lofty mountains which intersect it, insure a perpetual supply of moisture, and hence the country abounds in beautiful forests. The climate is one of the finest and most equable in the world; and, indeed, no other country possesses so many requisites for becoming a great commercial and naval power. The natives are sub-divided into very small communities or families, without any individual who possesses the slightest political authority, and are excessively jealous of each other. They are thus likely to become an easy prey to the European colonists, who are intruding themselves upon them; and it is not unlikely that this, the finest of the Polynesian races, may ere long become extinct, or at best, the hewers of wood and the drawers of water to their powerful invaders. These islands were discovered in 1642, by Abel Tasman, a Dutch navigator, who bestowed upon them their present barbarous name, in honour of the province of Zealand, in Holland. They were more fully explored by Cook, whose name is attached to the strait which he discovered between the two great islands. The northmost island is named *Eaheinomawee*, the middle one *Tavai-Poennamo* and the southmost *Stewart's Island*.

English Miles
0 5 10 20 30 40 50 60 70
In Spanish names X and J are used indifferently; both letters being pronounced exactly alike, with a sound, the nearest approach to which that can be made in England is that of a strongly aspirated H.
